SUMMARY

Recent Data Science graduate from Assumption University (GPA: 3.85/4.0) with hands-on experience in data analysis, machine learning, and AI modeling. Proficient in Python, SQL, and BI tools, with a strong ability to transform raw data into actionable insights. Experienced in building predictive models, dashboards, and data pipelines to support business decision-making. Eager to contribute analytical skills to solve real-world problems.

SKILLS

Programming & Data — Python (NumPy, Pandas), PostgreSQL, Next.js, React, FastAPI, ETL/Pipeline

Data Analysis — EDA, Data Cleaning, Feature Engineering, Statistical Analysis

Machine Learning — Scikit-learn, Regression, Classification, Clustering

Visualization — Power BI, Tableau, Matplotlib, Seaborn, Recharts, DAX

Tools & Technologies — GitHub, Excel (PivotTables, XLOOKUP, INDEX-MATCH, Power Query, DAX)

PROFESSIONAL EXPERIENCE

Dynamic Technology Group Co. Ltd.

10/2025 – 03/2026 | Remote

Full-Stack Developer

- Engineered a dual-platform FSMS for a real ISP maintenance client in Myanmar, replacing manual LINE messaging with a centralized Next.js admin dashboard and Flutter Android app
- Built a Node.js/PostgreSQL backend with REST APIs handling real-time ticket dispatch, automated material cost calculations, and Firebase Cloud Messaging push notifications
- Integrated geospatial mapping by processing .kmz files into GeoJSON via custom backend middleware, rendering network infrastructure overlays directly on Google Maps for field technicians
- Designed and delivered a multi-page analytics dashboard visualizing root cause distribution, SLA resolution trends, team efficiency metrics, and material cost breakdowns with dynamic date filtering

PROJECTS

Healthcare Operations & Patient Flow Analytics

05/2026 – Present

Pandas, PostgreSQL, Supabase, FastAPI, React, Recharts

- **Engineered a Python ETL pipeline** using Pandas and SQLAlchemy to clean and load **32,000+ records** into a normalized PostgreSQL database across **11 relational tables**.
- **Developed a 4-page React dashboard** utilizing Recharts and Tailwind to visualize clinical metrics including door-to-treatment wait times, staffing stress indices, and operational budgets.
- **Analyzed operational performance** to isolate critical outliers (e.g., 30-day readmissions exceeding the 11% NHS ceiling), driving data-backed clinical staffing and resource allocation.

Bank Customer Churn Analysis & Retention Strategy

04/2025 – 05/2025

Python, Pandas, Seaborn, Matplotlib, Streamlit

- **Analyzed 10,000+ customer records** using statistical testing and predictive modeling to identify key churn drivers (geography, activity status, age), enabling targeted retention strategies with 85% accuracy.
- **Engineered features and built logistic regression model** revealing 36% of high-value customers lack credit cards, directly informing upsell opportunities and risk mitigation initiatives.

Workforce Analytics: Understanding Attrition Drivers

04/2026 – 04/2026

Python, Power BI

- Developed a 4-page Power BI dashboard analyzing workforce composition, salary equity, performance distribution, and attrition drivers across a 2M-record HR dataset
- Translated raw HR data into actionable workforce insights including attrition segmentation by department and job level to support retention strategy

AUREX - Exam Paper Automation System

06/2024 – 10/2024

Python, NLP, Scikit-learn, Sentence-BERT, Pandas, Flask

- Developed a system to automate exam paper generation for large university courses. (Excel to Docs)
- Reduced exam preparation time by 95% (from ~4 hours to ~10 minutes).
- Built an end-to-end pipeline integrating Excel input, NLP-based duplicate detection, and automated Word document generation.

EDUCATION AND CERTIFICATIONS

Bachelor of Science (Information Technology)

2022 – 2026

Assumption University of Thailand

Major: Data Science and Informatics

GPA: 3.85/4.0

Google Data Analytics Professional Certificate

04/2024

DataCamp Data Analyst Associate

01/2026

AWARDS

Academic Merit Scholarship, Assumption University of Thailand

- Full scholarship awarded for maintaining GPA ≥ 3.85
- Received: Semester 2/2024, Semester 1/2025, Semester 2/2025

President's Certificate of Honours, Assumption University of Thailand

- Awarded for achieving GPA ≥ 3.50 in an academic year
- Received: Year 2, Year 3 and Year 4

Outstanding Senior Project Award, Assumption University of Thailand

- Awarded to top 6 teams out of 56
- Project: AUREX Exam Paper Automation System

LANGUAGES

Burmese — Native, **Japanese** — JLPT N3 Certificate, **English** — Advanced
